

# AIRSTAGE™ V-II

Variable Refrigerant Flow System

## Multi Air Conditioning System for Buildings

Large Capacity Multi VRF System  
DC Inverter Control Compressor  
Long Piping System Design  
High Efficiency Refrigerant R410A

FUJITSU GENERAL LIMITED

# All for Comfort

Smart and cutting edge design

Extensive lineup from 8HP to 48HP in 2HP increment

Connectable indoor unit capacity ratio up to 150%

## High Efficiency Operating System

EER/COP has been significantly improved by unique inverter technology and refrigerant control technology.

## Installation Flexibility

Total pipe length of 1,000m and 150m actual pipe length. From small to large buildings, any application can be supported.

## Compact Design

The outdoor unit size has been significantly reduced by optimizing of equipment. This allows for a reduction in the required installation area floor space.

## User Friendly Central Control

Diverse building air conditioning control functions can be controlled easily by central air conditioning control.

Advanced system considers  
high efficiency operation

## High Efficiency Operation

Energy saving technology that boosted operation efficiency

### Powerful large propeller fan

By using CFD\*1 technology, A newly designed fan achieves high performance and low noise operation.

\*1. CFD = Computational Fluid Dynamics

### DC fan motor

Power consumption has been reduced by 25% compared to previous models by using a compact and high performance DC fan motor.

### Subcool heat exchanger

High Heat Exchange efficiency is achieved by using an internal projection shape double pipe construction.

### Sine-wave DC inverter control

High efficiency operation is realized by using a sine wave DC inverter control.

### DC twin rotary compressor

Significantly greater efficiency is realized by use of a large capacity DC twin rotary compressor with substantially increased refrigerant intake and compression efficiency.

### 4-face heat exchanger

Heat exchange efficiency is significantly improved by the introduction of a new 4-face heat exchanger that increases effective surface area.

### Front intake port (corner cut air inhaling structure)

In multiple outdoor unit installations, the unique front intake design improves airflow into the Heat Exchanger.

# Significantly improved EER/COP

Significantly greater efficiency is realized by the use of a DC twin rotary compressor, inverter technology, and large heat exchanger.

\* "EER/COP" is the coefficient of performance

[ = capacity (kW) ÷ input power (kW) ].

\*EER/COP values are based on our own testing method.

\*2. The data refers to an 8HP outdoor unit.

## Energy efficiency combination

Choice of space saving or energy efficiency combinations

## Various energy saving features

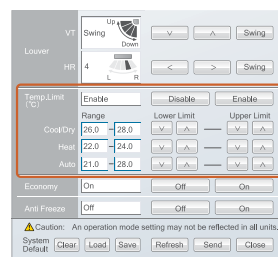

### Room temperature set point limitation

The minimum and maximum temperature range can be set giving further energy saving while considering the comfort of the occupants.

### Auto-off timer

Each remote controller is equipped with an OFF timer function that automatically stops operation when a fixed time has elapsed from the start of operation. This prevents waste of energy.

(Note : Except simple remote controller)

### Peak cut operation

Operation capacity can be set in 4 steps for rated capability. The power consumption at peak is cut down and the maximum load is suppressed.

### Economy operation

Economy operation can be set by remote controller. The temperature setting is offset automatically over a certain period of time.

V-II systems can be applied to a wide variety of Building applications due to the reduced outdoor unit size and piping length capabilities

## Design Versatility

### Overall piping length 1,000m

World's top class overall piping length of 1,000m allows for application in a wide variety buildings.

### High static pressure of 80Pa

The outdoor unit can have a condenser hood easily connected with a static pressure of 80Pa standard. This allows outdoor units to be installed within plant rooms in high rise buildings.

**Powerful discharge with an external static pressure of 80Pa.**

**80Pa**  
as standard

Previous model

V-II series

Large diameter fan and DC motor has been utilized allowing an external static pressure of 80Pa. This is approximately 2.6 times greater than the previous model.

Installation Example

Total pipe length  
**1,000<sup>\*1</sup>m max.**

Height difference between outdoor and indoor units

**50m max.**

For the outdoor unit stated below : 40m max.

Actual pipe length  
**150m max.**

Pipe length from first separation tube to the farthest indoor unit

**60m max.**

Height difference between indoor and indoor units

**15m max.**

\*1. Note : When there is 1 outdoor unit, the maximum is 700m.

## Space saving and compact size

Compact size has been achieved by significantly reducing the width of the outdoor units compared to previous models.

## High capacity connection

Various combinations from 8HP to 48HP with 2HP increments. 12 types, 55 models of indoor units can be selected ranging from 2.2kW to 25kW in capacity. A maximum of 150% indoor unit connectable capacity.

Note : When indoor unit connected capacity is greater than 100%, individual indoor units will operate at a slightly lower capacity when maximum capacity is required.

## Wide operating range

Installation in extreme temperature conditions is possible due to an increase in operational range.

Cooling : -15°C~46°C  
Heating : -20°C~21°C

High reliability considering  
long-term safety and confidence

## High Reliability

## Life-extending operation

### Outdoor unit rotational operation

The compressor starting order is rotated so that the running time is shared.

Note: The inverter compressors start in priority.

Rotational operation is alternated by the start / stop timing of the compressors

# Backup operation

If one of two compressors malfunctions, it will not affect the operation of the remaining outdoor units.

## Outdoor Units

If one of compressor fails, backup operation will be performed by the remaining compressors as emergency.\*1

## Indoor unit continuous operation

Each indoor unit is controlled individually on the system network. This allows all indoor units to continue to operate unaffected even if an error should occur at any indoor unit's on the VRF network system.

\*1 Note: Backup operation may not be possible depending on the combination and trouble state.

# Adoption of blue fin heat exchanger

Corrosion resistant of the heat exchanger has been improved by the introduction of blue fin treatment to the outdoor unit's heat exchanger.

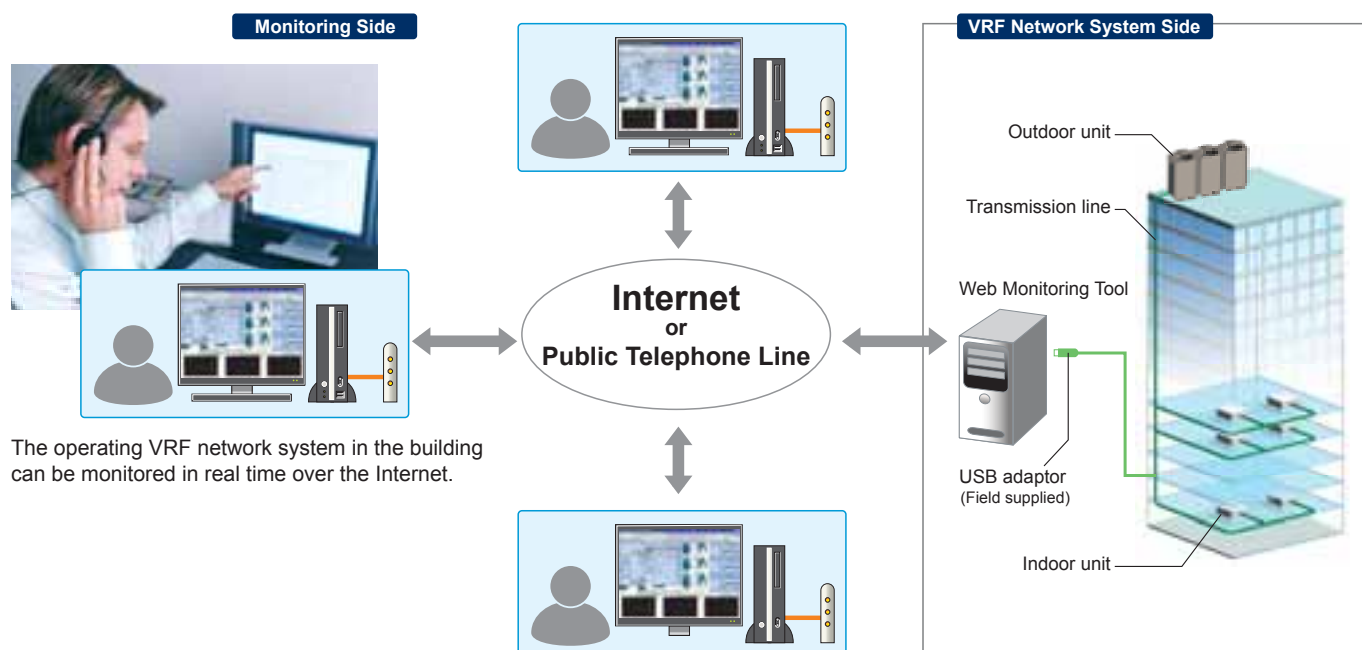

## Blue fin heat exchanger

- Cobalt Blue protection
- Standard chromate protection
- Aluminium base material
- Hydrophilic coating

# Remote monitoring

The Web Monitoring system allows you view system operation at all times over the internet ensuring trouble free operation.

From transportation of the product to address setting for commissioning, significant improvements have been made which reduce the cost of installation.

# Easy Installation

## Easily transported

**Light weight**

**20%**  
weight reduction  
(Than Previous model)

Note: In the case of 14HP

**Easily craned using lifting belt hooks**

Design of outdoor unit allows for lifting straps to be used

**Can be transported in a small elevator**

**Transporting by forklift**

Transport with forklift is possible.

## Easy piping connection

The need for an oil equalization pipe as required on the previous model has been removed.  
The installation costs have been reduced by employing a simple 2 pipe connection

## Simple signal line connection

Installation is made easier as the communication wiring can be connected continuously to any component.

Up to maximum  
length **3,600m**

V-II series

Note: In a multiple refrigerant system installation,  
Automatic addressing sequence cannot be initiated

## Easy access

By adopting a L-Shape front panel that can be removed, the work space for installation and service has been significantly expanded by this new design.  
For multiple installations, work is performed easily and efficiently even in a narrow space.

Expansion of  
work space

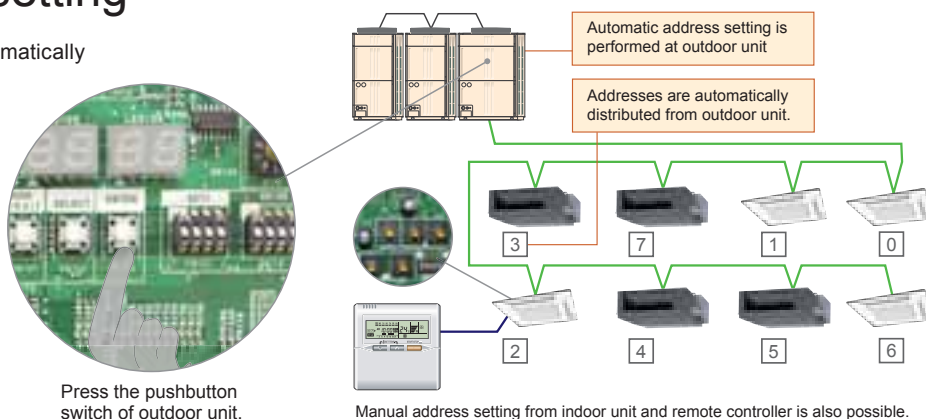

## Four way piping connection

Piping and wiring are available to the front, left and right, and bottom.

## Automatic address setting

The address of each indoor unit can be automatically set by button switch of outdoor unit.

Low noise, easy operational settings, and comfortable temperature adjustment allows for V-II systems to be used in building air conditioning applications.

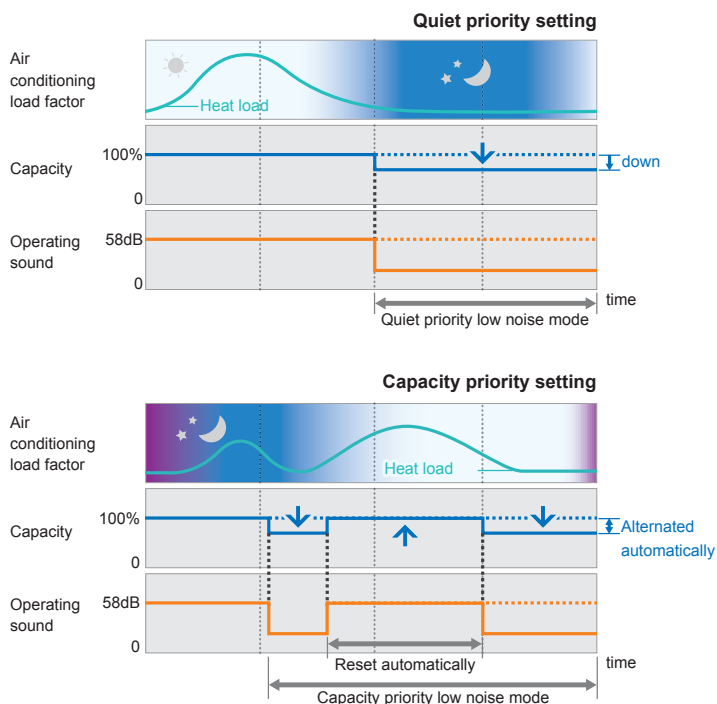

## Comfort and Convenience

### Quiet operation

#### Low noise mode

Two low noise modes can be selected automatically by quiet priority setting and capacity priority setting depending on the usage environment and outside temperature load.

#### Low noise design

Compressor noise has been significantly reduced by shielding the compressor compartment.

Compressor compartment

#### Indoor unit

Low noise indoor unit lineup

Compact Cassette

Compact Duct

Slim Duct

Low Static Pressure Duct

Compact Wall Mounted

## Auto changeover function

Auto changeover setting allows for the product to easily switch between cooling and heating modes regardless of the operation mode of other indoor units. This can be done via specific indoor unit with wired remote controller. This ensures comfortable operation all year round.

## Precision refrigerant flow control

Precision and Smooth refrigerant flow control is achieved by using a DC Inverter control in conjunction with individual indoor unit electronic expansion valve control. This allows for a high precision comfortable temperature control of  $\pm 0.5^{\circ}\text{C}$ .

Thermal change of the room  
\*Simulation in heating operation.

Comfortable operation is achieved due to a small variation of room temperature

## Individual air conditioning control

The desired temperature conditions of each room are met due to the Individual thermostat control of each indoor unit.

### Simple central management function

7.5 inch large LCD Touch Panel Controller

**Simple central control operation**  
Simple operation by icon display and color touch screen

**Yearly schedule function**  
Daily starting & stopping and temperature setting are managed.

**Clock setting function**  
The clock of each individual controller is periodically corrected.

Schedule screen

## Non-stop oil recovery operation

A comfortable room condition is maintained during oil recovery mode because the product continues to operate without stopping the cooling or heating operation.

Designed for Quick Service response,  
Easy maintenance and Troubleshooting

# Easy Service & Maintenance

## Design for easy service and maintenance

Inspection and replacement of main parts are easier due to innovative construction and an LED operational display.

Consolidated electrical components make maintenance easy  
Movable PCB panel that allows for easier maintenance work behind the PCB

Easy-to-read 7-segment LED display which explains operational and trouble status

Maintenance of electrical components, valves, and compressor parts from the front is possible.

**Split front panel**  
Split front panel allows for maintenance from top or bottom of the outdoor unit

### Error status can be checked easily via the indoor unit wired controller

An error code is displayed on a liquid crystal screen.

#### Wired Remote Controller

#### Simple Remote Controller

## Emergency stop function

Emergency alarm can be received by indoor, outdoor units or Touch Panel Controller when they received it, all units will be stopped.

Note: In case of received Emergency alarm by Indoor / outdoor unit : All units connected within same refrigerant system will be stopped.  
Touch Panel Controller : all unit connected within VRF network system with Touch Panel Controller will be stopped.

## Continuous operation during maintenance

### Non-stop operation

When servicing a specific indoor unit, maintenance can be performed even without turning off the other indoor units.

## Trouble diagnosis by Service Tool

Suitable maintenance is possible by analysis of the operation data. Connection anywhere in the VRF network is easy.

\*1 Minimum connectable indoor unit number is 2.  
However ARXC72 and ARXC90 can be used signal connection.

\*2 The noise value is the value when measured in an anechoic room.  
When measured in the actual installed state, surrounding noise and reflections are received and the measured value is usually larger than the indicated value.

Compact size panel design  
 that fits standard ceiling panel (600x600mm)

## 2-stage turbo fan

### High efficiency design by 2 stage structure

An evenly spread air distribution across the heat exchanger is possible due to the new 2 stage turbo fan which produces two separate airflow streams.

### Previous turbo fan

In the case of a previous fan, the air outlet range was narrow as the airflow moved to the motor side which meant the velocity of air passing through the heat exchanger was uneven.

## Quiet quality

Optimization of wing form (laminar wing type) and wing number (7 blades each)

Designed by CFD-analysis (fluid) simulations

### Adoption of laminar wing

## Specifications

	Weight	kg	2.6					

F\* : FY (FUJITSU) ; FG (GENERAL)

Note : Specifications are based on the following conditions.

Cooling : Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB.  
 Heating : Indoor temperature of 20°CDB / (15°CWB), and outdoor temperature of 7°CDB / 6°CWB.  
 Pipe length : 7.5 m; Height difference between outdoor unit and indoor unit : 0 m. Voltage : 230 [V].

## Improvement of the airflow distribution

### ① Maintenance of fan motor and fan

Maintenance of the fan motor and fan can be done easily after taking off the panel as the bell mouth of the fan can be removed easily.

A : Fan motor    B : 2-stage turbo fan  
C : Bell-mouth    D : Panel

### ② Long life filter : standard equipment

### ③ Adaptation of transparent drainage parts

During installation, maintenance and operation, the drain pump and kit can be checked easily.

## High lift drain pump

## High ceiling mode

The compact cassette can be installed up to a height of 3.0m (12/14/18/24).

Model code	The maximum height from floor to ceiling (m)	
	Standard mode	High ceiling mode
07	2.7	—
09	2.7	—
12	2.7	3.0
14	2.7	3.0
18	2.7	3.0
24	2.7	3.0

## Compact design

World's first 24,000Btu model in the compact cassette category  
(Easy installation by taking off ceiling panel of 600 x 600 size)

## Optional parts

Air Outlet Shutter Plate :            UTR-YDZB  
Insulation Kit for High Humidity : UTZ-KXGC  
Fresh Air Intake Kit :                UTZ-VXAA

Powerful, wide airflow and quiet operation

## High efficiency turbo fan with 3-dimensional blade

High efficiency airflow distribution has been achieved by the introduction of a 3 dimensional blade which increases the air passing over the heat exchanger.

### Previous turbo fan

Air passing through the heat exchanger was uneven and the air would only flow close to the ceiling.

← : Spin direction → : Airflow direction ••••• : Turbulent flow noise

Slim Compact design allows for easy installation  
in narrow ceiling spaces up to 270mm

## Slim & Compact design

In the case of bottom return air connection, not only does the indoor unit design allow for installation in a narrow ceiling space of up to 270mm, Further space savings have been achieved by mounting the electrical control box internally inside the chassis.

Pipe length : 7.5 m; Height difference between outdoor unit and indoor unit : 0 m.

## Line-up of low-noise and high-power models, compatible with a wide range of static pressure

### Low Static Pressure Duct type

#### Optimum model for hotels or bedrooms

An ultra low-noise model that achieves a quiet interior. Perfect for hotels or bedrooms with limited air duct installation space. Two different levels can be selected according to the static pressure range.

**25dB**

ARXB24  
Low

**Max.  
150Pa**

### Duct type

#### Powerful model with a flexible design

With a powerful motor, appropriate for a wide range of static pressure. Flexible air duct installation is possible in a large space such as an office.

## Easy maintenance

See below for the case of rear suction type

### Previous model

### New model

Structural improvement is attained by making the bottom panel two pieces, front and rear. The internal fan casing is also manufactured in two pieces, namely upper and lower. The maintenance of the motor and fan can be easily carried out by removing the rear panel and the lower part of the casing while leaving the main chassis installed.

## Installation styles

### Embedded in Ceiling

### Hanging from Ceiling

## Two-direction drain piping

### Optional parts

Remote Sensor Unit : UTD-RS100  
Long Life Filter : UTD-LF25NA  
Flange (Square) : UTD-SF045T

Note : Specifications are based on the following conditions.

Cooling : Indoor temperature of 27°CDB / 19°CWB, and outdoor temperature of 35°CDB / 24°CWB.

Heating : Indoor temperature of 20°CDB / (15°CWB), and outdoor temperature of 7°CDB / 6°CWB.

Pipe length : 7.5 m; Height difference between outdoor unit and indoor unit : 0 m.

## Easy installation (Compact size & Lightweight)

### Models : ARXC36

A compact size and lightweight indoor unit has been developed by reducing the basic chassis and the overall material weight.

**Volume**  
**47.5%**  
**down**

**Weight**  
**40%**  
**down**

## Low noise

### Models : ARXC36 / ARXC45 / ARXC60

Cutting off the corners of the conventional indoor unit front panel and fan casing, has enabled less turbulent air flow. Low noise is realized by adopting a plastic case and a plastic fan.

### ARXC36LATH : Plastic fan [45dB(A)]

\* Model : Material  
(At 100Pa : Actual noise measurement value)

## Static pressure selection

### Models : ARXC72 / ARXC90

2 Types of static pressure mode are selectable.

The adoption of a single phase fan motor allows  
3 steps fan speed control

## Optional parts

Long-Life Filter : UTD-LF60KA (For ARXC36 / 45 / 60)

IR Receiver Unit : UTB-\*WB

\*WB : YWB, TWB

## Dimensions (Unit : mm)

### Models: ARXC36 / ARXC45 / ARXC60

- ① Refrigerant piping flare connection (Liquid)
- ② Refrigerant piping flare connection (Gas)
- ③ Drain piping connection

## Filter features

High quality air conditioning by incorporation of high performance filter.

**Long-life\* Ion  
Deodorization Filter**

The filter deodorizes by powerfully decomposing absorbed odors using the oxidizing and reducing effects of ions generated by the ultra-fine-particle ceramic.

(\*The filter can be used for approx. 3 years if it is washed under water to restore its surface action when it is dirty.)

**Apple-catechin Filter**

Fine dust, invisible mold spores, and harmful microorganisms are absorbed onto the filter by static electricity, and further growth is inhibited and deactivated by the polyphenol extracted from apples.

# Wired Remote Controller

UTY-RNK\*

Max. controllable  
**16**  
indoor units

The room temperature can be controlled by detecting the temperature accurately from the built-in sensor

- Simple operation with Built-in Weekly / Daily Timer.
- Control up to 16 indoor units.
- Up to 2 wired remote controllers can be connected to a single indoor unit.

## Functions

### Powerful features and compact size

This Wired Remote Controller incorporates four primary functions into a single unit.

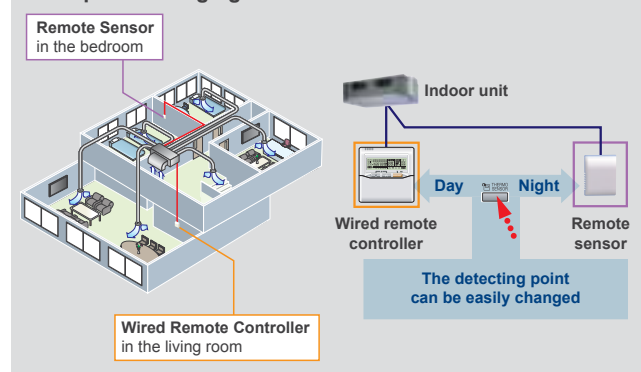

### Accurate and comfortable

Indoor temperature can be detected accurately by the inclusion of a thermo sensor in the body of the wired controller. This new wired remote controller and the optional remote sensor allows flexibility in sensor location, suitable for all requirements.

#### Example of changing sensor

Displayed temperature is set temperature.

### Built-in timers

Easy-to-understand time bar display

**Weekly timer** : Possible to set ON/OFF time to operate twice each day of the week.

#### Setup screen example

Set to Wednesday: 8:00 to 20:00.

#### Screen after setup

**Setback timer** : Possible to set temperature for two times spans and for each day of the week.

#### Setup screen example

Set from Sunday to Saturday:  
12:00 to 15:00, 28°C.

#### At "Weekly timer" + "Set back timer" setup

### Diagnosis check function

Two methods are available for determining the cause of failure in the event of a malfunction occurs:

- Malfunction diagnosis function
- Error history (Last 16 error codes can be accessed)

### Simple installation

Components are compatible with standard switch boxes. Flat back surface allows to be installed wherever it is needed.

## Specifications

Model name	UTY-RNK*
Power Supply	DC 12V
Dimensions (H x W x D) (mm)	120 x 120 x 17
Weight (g)	160

DC12V is supplied by the indoor unit. K\* : KY(FUJITSU), KYT(FUJITSU), KG(GENERAL)

# Simple Remote Controller

## UTY-RSK\*

## UTY-RHK\* (Without Operation mode)

Compact remote controller provides access to basic functions

- Up to 16 indoor units can be controlled with one remote controller.
- Suitable for hotels or offices as it is easily operated with no complex functions.

Max. controllable  
**16**  
indoor units

UTY-RSK\*

UTY-RHK\*  
Without Operation mode

## Functions

### User-friendly operation

- Provides access to basic operations, such as Start / Stop, Fan control, Operation mode switching, and Room temperature setting.
- A large On / Off button is provided in the centre of the remote controller for easy operation.
- Can be used jointly with other individual control unit.
- Following an error display, diagnostics can be carried out on the controller.

### Background light

- Background light enables easy operation in a darkened room.
- Background light activates during all button operations, and lasts 10 seconds in Operation mode and 5 seconds in stop mode after a button is pressed.

### Simple installation

Can be mounted on the European Mounting Box (Installation dimension: 60mm) or the JIS Built-in Box (Installation dimension: 83.5mm).

### Functions summary

Model	UTY-RSK*	UTY-RHK*
Operation		
On / Off	●	●

# Wireless Remote Controller

UTY-LNH\*

Simple and sophisticated operations  
with a choice of 4 daily timers

• A single controller controls up to 16 indoor units.

Max. controllable  
**16**  
indoor units

Selectable  
**4**  
daily timers

## Functions

### Built-in daily timer

Select from 4 different timer programs :

On / Off / Program / Sleep

**Program timer** : The program timer operates the ON and OFF timer once within a 24 hour period.

**Sleep timer** : The sleep timer function automatically corrects the set temperature according to the time setting to prevent excessive cooling or heating during sleep hours.

#### Cooling operation/dry operation

When the sleep timer is set, the set temperature automatically rises 1°C every hour. The set temperature can rise up to a maximum of 2°C.

#### Heating operation

When the sleep timer is set, the set temperature automatically drops 1°C every 30 minutes. The set temperature can drop to a max. of 4°C.

### Easy installation and operation

Code selector switch prevents indoor unit mix-up. (Up to 4 codes can be set.)

Wide and precise

### Address setting

During installation work, address setting can be performed using the Wireless Remote Controller, thus eliminating manual switch setting.

## Specifications

Model name	UTY-LNH*
Battery	1.5V (R03 / LR03 / AAA) x 2

## Group Remote Controller

UTY-CGG\*

Group control of indoor units with simple operation

- Up to 8 remote controller groups can be controlled by one Group Remote Controller.
  - Up to 64 Group Remote Controllers can be connected in one VRF network system.
  - Network Converter (UTY-VGGX) is required to connect Group Remote Controllers to a VRF network system.
- (Network Converter allows up to 4 Group Remote Controllers)

Max. controllable  
**8**  
remote controller groups

Max. connectable  
**64**  
group R.C. in  
a VRF network  
system

### Functions

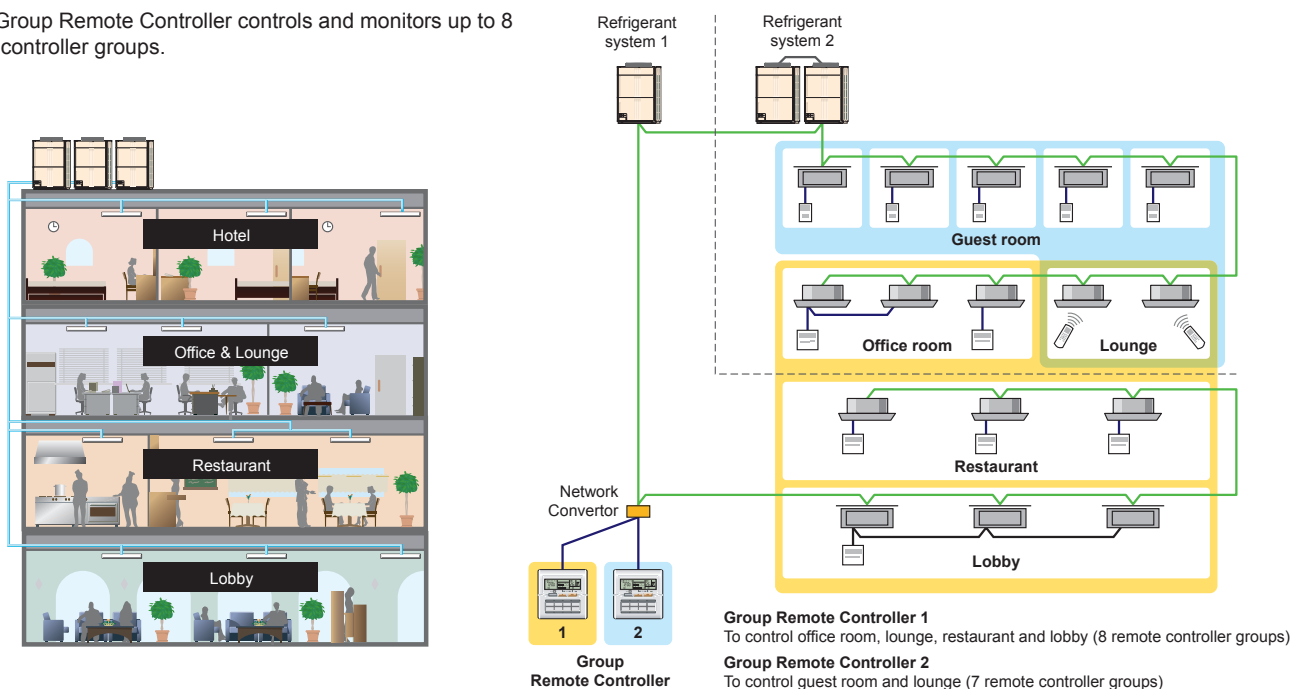

#### High performance and compact size

ON / OFF, Operating mode, Room temperature and Fan speed setting can be controlled / monitored centrally or individually.

#### Control up to 8 remote controller groups

Single Group Remote Controller controls and monitors up to 8 remote controller groups.

### Built-in weekly timers

The weekly timer is provided as a standard function.

1. The timer can be set up for up to 4 times per day. (On / Off, operating mode, set temperature)
2. Allows separate settings for each day of the week.

#### ON / OFF switching

Air conditioning ON/OFF setting corresponding to air conditioning specification needs is possible.

#### Cooling / Heating switching

Switching between the cooling mode and heating mode can be set by time.

#### Temperature switching (Peak power cut)

Since peak power cut is performed in a planned way, setting which changes the room temperature linked with time is possible.

#### Temperature switching (Anti-freeze)

Low temperature heating operation can be set to prevent freezing in cold regions at night, etc.

#### Stop setting

Indoor unit stop setting at operation end time is possible.

## Useful functions

**1** Timer setting at all the connected indoor units is possible by centralized timer on the front panel.

**ALL TIMER Button**  
Press the ALL TIMER button to turn the timer operation on or off for all indoor units.

**3** The indoor unit can be quickly turned on and off by ON / OFF button of each indoor unit on the front of the door.

**Indoor Unit Name Labels**  
Write the names of the indoor units on the included labels and attach them.

**ON / OFF Button**  
Press the ON / OFF button to turn the corresponding indoor unit on or off.

**With cover closed**

**Indoor Unit Operation Indicators**  
Timer setting at all the connected indoor units is possible by centralized timer on the front panel.  
■ : On    □ : Off  
● : Timer operation    ▼ : Selection

**2** All the connected indoor units can be turned on / off simultaneously by centralized ON/OFF button on the front of the cover.

**Operation Lamp**  
This is on if any of the indoor units is operating. This flashes if any of the indoor units has malfunction(s).

**ALL OFF Button**  
Press the ALL OFF button to turn off all of the indoor units.

**ALL ON Button**  
Press the ALL ON button to turn on all of the indoor units.

**Timer and Clock Display and setting**

Weight (g)	200

DC12V is supplied by a network converter. G\* : GY(FUJITSU), GG(GENERAL)

# Central Remote Controller

## UTY-DCG\*

Central control of small- and medium-sized buildings and tenants. The operation status of all connected indoor units can be viewed at a glance on a large LCD monitor to simplify individual control to batched control.

- Individual control and monitor of 100 indoor units
- 5 inch TFT color screen
- User friendly view and easy operation
- External input / output contact
- Detachable power supply unit
- Corresponds to 7 different languages (English, Chinese, French, German, Spanish, Russian, Polish)

Max. controllable  
**100**  
Indoor units

Max. controllable  
**16**  
groups

## User friendly operation

Operation status monitor displays for all indoor units  
Easy comprehensible display and operation button

### Function Menu

Function menu displays the items to select.

Registration indoor unit

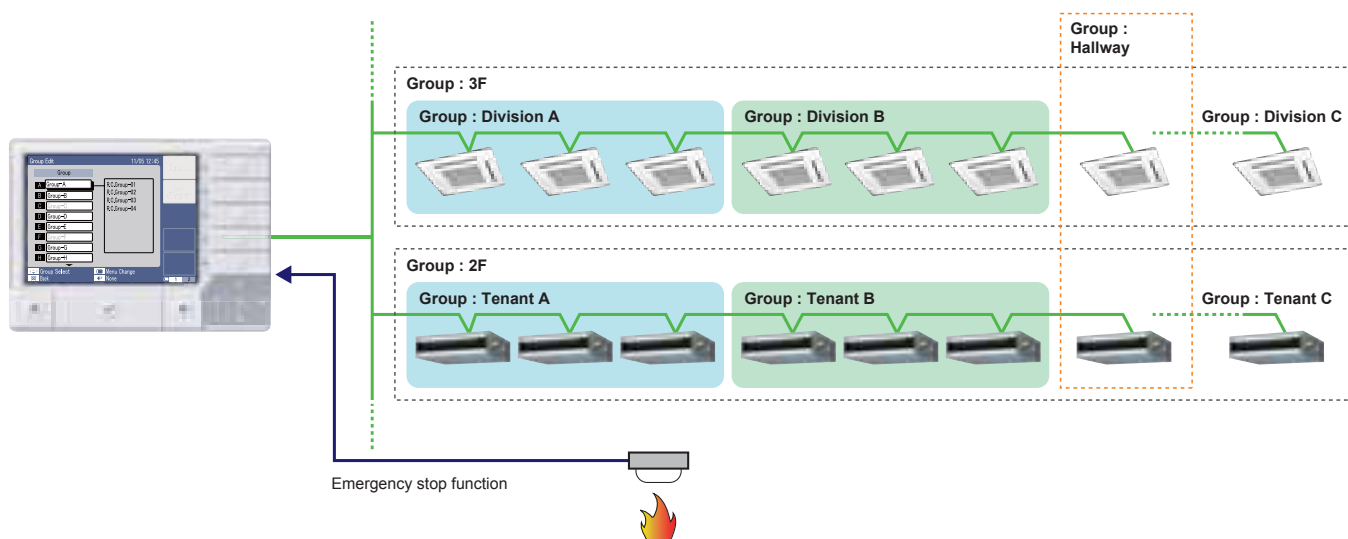

Operation guidance

**Function button**  
1 to 1 function button  
supports easy setting.

## System overview

- It allows multiple indoor units grouping (Max.16 groups controlled)
- Interlock with external device

## Functions

### Diverse control of indoor units

- Individual control (On / Off, Mode, set Temp, Fan speed, Economy operation, Antifreeze operation)

- Remote controller prohibition (All, On / Off, Mode, Temp, Timer, Filter) :** R.C prohibition setting prohibits individual remote control operation from this controller

- Room temperature set point upper and lower limitation

- Weekly timer :** Weekly timer can set the timer by various combinations.

- Automatic clock adjustment :** The time setting of each controller can be set in batch automatically.

### Error history

- Max 200 Errors memorize.
- Suitable maintenance is possible by analysis of the error history data.

No.	Date Time	Name	Address	Error Code
001	2009/09/01 13:05	R.C.Group-01	01-00-00	14
002	2009/09/01 13:05	R.C.Group-01	01-00-00	14
003	2009/09/01 13:05	R.C.Group-01	01-00-00	14
004	2009/09/01 13:05	R.C.Group-01	01-00-00	14

## Easy Installation

- The control panel and power supply unit can be installed separately.
- For flexibility in installation, the Control panel can be built into the wall or fix on the wall.

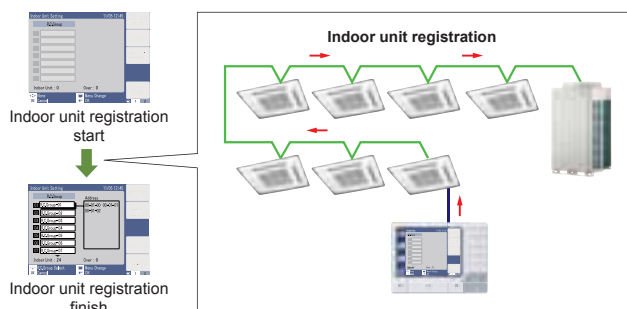

### Setting pattern 1

### Setting pattern 2

- Automatic or manual indoor unit registration

## Specifications

Model name	UTY-DCG*

G\* : GY(FUJITSU), GG(GENERAL)

# Touch Panel Controller

UTY-DTG\*

Max. controllable  
**400**  
Indoor units

High visibility and easy operation via high resolution  
7.5 inch TFT-LCD touch panel screen

- Large-sized 7.5-inch TFT color
- LCD Easy finger touch operation
- Stylish shape and design to suit all application
- No additional component is required for installation
- Up to 400 indoor units can be controlled
- Selectable 2 display types (Icon / List) in monitoring mode
- Corresponds to 7 different languages, English, Chinese, French, German, Spanish, Russian, Polish.

## Functions

Real size screen image

## Easy operation

- Large and wide-angled LCD is easily viewable even at a distance
- Easy-to-understand icon-driven Graphical User Interface (GUI)
- Wide range of simple-to-understand icons

- Operation can be selected using your finger or the dedicated touch pen by pressing the appropriate on-screen icon
- Up-to-date status display
- Background color identifies current control operation Blue for monitoring, green for operational control

## Easy maintenance

- Flat touch screen is easily cleaned
- Non-glare coating on touch panel controller minimizes fingerprint marking
- Easy-to-remove front cover

## Up to 400 indoor units can be controlled

## Function

- Up to 400 indoor units can be controlled
- It allows multiple indoor units grouping
- Schedule timer function is standard (20 patterns per day)
- Emergency stop function(through the external input control)
- Temperature upper and lower limit setting
- The clock of each indoor unit correct setting

Individual control

Flexible grouping

Schedule control

Indoor units operation monitoring

## Automatic clock adjustment

The time setting of each controller can be set in batch automatically.

## Versatility

CSV format data edited by PC can be imported to Touch Panel Controller.

## Easy installation

Touch Panel Controller is easily mounted to the wall Flat back surface allows to be installed wherever it is needed.

- Correctable mechanism for tilting (horizontal) after the installation of the body

No additional component is required for installation

- There is no need for the installation space of power supply adaptor and transmission adaptor etc.

## Specifications

Model name	UTY-DTG*
Power Supply	100-240V 50/60Hz
Dimensions (H x W x D) (mm)	260 x 246 x 54
Weight (g)	2,150
Interface	USB 2.0

G\* : GY(FUJITSU), GG(GENERAL)

# System Controller

**Software**
**UTY-APGX**

System Controller realizes the advanced integrated monitoring & control of VRF network system from small scale buildings to large scale buildings.

- Up to a maximum of 4 VRF network systems, 1600 indoor units, and 400 outdoor units can be controlled.
- Supports VRF S series, V series and V-II series.
- In addition to air conditioning precision control function, central remote control, electricity charge calculation, schedule management, and energy saving functions are strengthened and building manager and owner needs are met.

Max. controllable  
**4**  
VRF network  
systems

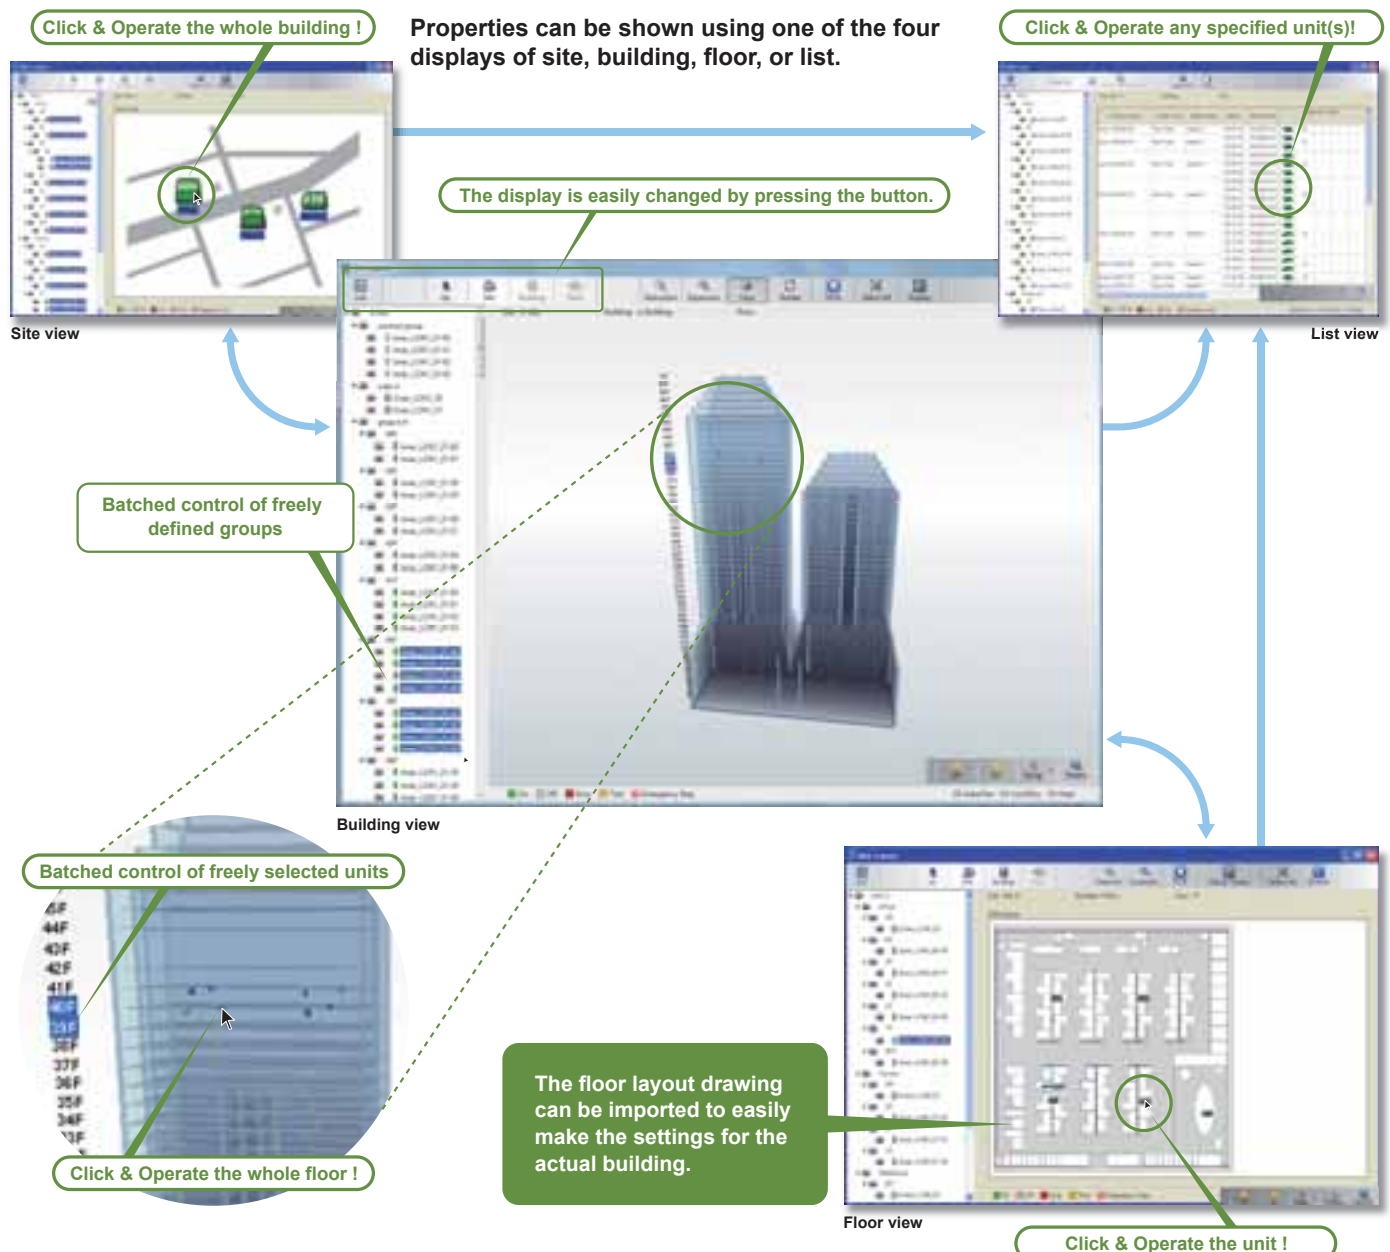

Max. controllable  
**400**  
Outdoor units

Max. controllable  
**1,600**  
Indoor units

## Functions

### User friendly view and operation

- **Click & Operate** : The property is shown visually from the perspective most suitable for operation and operated accordingly (Click & Operate). You can select from among the 4 displays of site, building, floor, or list.
- **Freely define groups for batched control** : Indoor units can be freely grouped for simple batched control from a tree menu. Grouping by hierarchal structure, such as by section, division or department is possible.

## Energy saving management

With UTY-PEGX Option

### Peak cut operation Option

A power meter is connected to detect the total power consumption while shifting the indoor unit set temperature, set the indoor unit forced thermostat off, and taking other measures to carefully control the power consumed while maintaining comfort and conducting control to maintain the target power consumption set for each time. The indoor units to be controlled can be freely grouped and the control level can be set.

### Outdoor unit capacity save Option

Outdoor unit capacity save switches the outdoor unit capability upper limit to suppress power consumption during hot summers and cold winters by averaging the power saving effect of each refrigerant system. You can select from 50% or more of the capacity upper limit.

Outdoor unit capacity control screen

### Indoor unit rotation operation Option

The operation of indoor units can be automatically rotated within a group in accordance with the set annual schedule to reduce power consumption while maintaining comfort. The indoor unit operation stoppage rate can be selected.

Indoor unit rotation screen

### Batched stop

Batched stop at a freely set time for a property, building, or freely set block unit can be done to prevent any air conditioning unit from being forgotten to be turned off at the end of office hours, etc. In addition, any air conditioning unit whose operation is left on can be immediately identified by the icon color for a building or indoor unit in the monitoring screen and batched stop conducted in response.

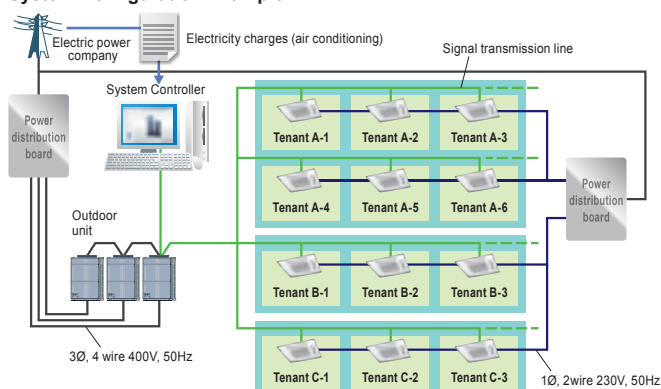

## Electricity charge apportionment

### Electricity charge apportionment calculation framework

Suppose you want to find the power consumed by the air conditioners of each tenant from the electricity charge for each month. With electricity charge apportionment function, used energy apportionment ratio will be provided, calculating in detail the energy consumed by the units used by each tenant. This information is then used to calculate the charges for the electricity consumed for air conditioning by each tenant from the total electricity charges in the bill from the electric power company. (See figure at right) The detailed calculation takes into consideration such things as unused rooms and nighttime electricity charges and shows them in a charges calculation sheet.

### System Configuration Example

### Energy used by each unit is calculated

### Energy apportioned by the outdoor unit to each indoor unit is calculated

### Electricity charges by tenant are calculated

The distribution ratio for energy used by each indoor unit is calculated and the electricity charges for the energy used by each indoor unit are calculated from the total electricity charges.

The energy used by each indoor unit and the energy apportioned by the outdoor unit are added together to calculate the total amount of energy used.

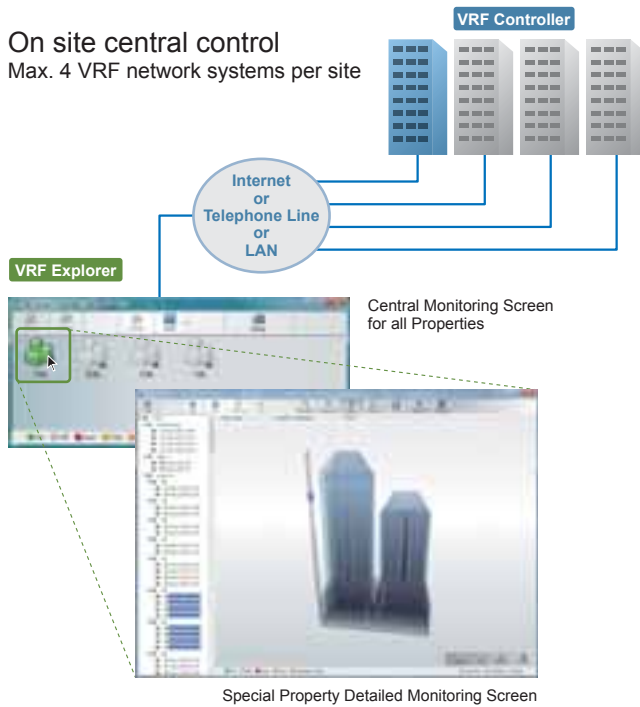

## Remote centralized control

System Controller may be used on site or remotely over various networks for remote central control. System Controller requires 2 softwares working together. VRF Controller runs on site and communicate with VRF system. VRF Explorer runs remotely and provides user interface and communicate with the VRF Controller. VRF Controller and VRF Explorer program may run in a single PC or in different PCs separated by network. By using VRF Explorer software, one PC can perform central control of 10 VRF system sites with max. 20 buildings per site.

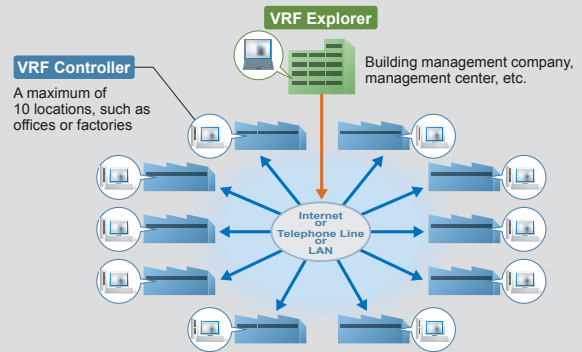

### On site central control

Max. 4 VRF network systems per site

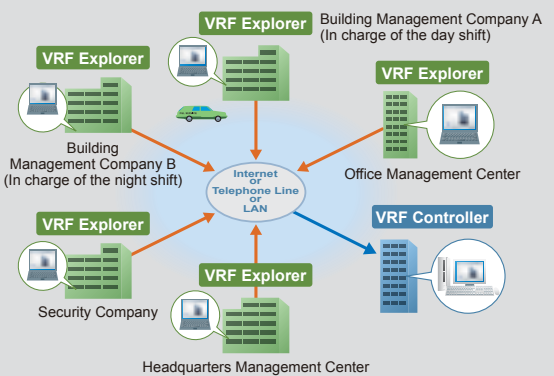

## Remote central control

1 VRF Explorer can control or monitor up to 10 sites.

1 VRF Controller can be monitored from any number of VRF Explorers (Up to 5 connections simultaneously).

## Can be used for a variety of applications

### Air conditioning management for large shopping malls or the outlets of nationwide franchises

- Remote centralized management can be used for nighttime only to manage the air conditioning of multiple stores, operate air conditioning for people working overtime, and checking to see if employees forgot to turn off the air conditioning after they leave.
- Multiple users via a LAN can control the air conditioning in the office, general affairs department, or janitor's room.
- The air conditioning for franchise locations nationwide can be centrally controlled from headquarters to facilitate operation status and control to save energy.

Commercial buildings

Franchises

### Air conditioning management of multiple buildings spread over a large site

- Batched operation of the factory buildings on a large site can be remotely conducted from the management office of the administration building to employ power saving operation.
- The headquarters can conduct centralized remote monitoring of the company's factories in outlying areas to improve the power saving effect for the entire company.
- Controlling the operation of each building and each classroom on campus makes it possible to reduce expenses by remotely controlling those spaces in accordance with the teaching schedule.

Factories

Universities

Hospitals

### Provides high-quality building air conditioning service

- Service companies that manage buildings that are empty at night after the managers leave to go home can conduct centralized remote monitoring of the building without dispatching employees to the site, which allows them to monitor the air conditioning for multiple clients.
- The System Controller remote monitoring and control functions can be used to receive outsourcing business from small and medium size building owners to manage their air conditioning energy.
- Nighttime only remote monitoring of multiple properties after the people leave can be performed for areas that require 24-hour operation, such as server rooms, to monitor for problems.

Service Companies

## Security Support

### Employs SSL Encryption Technology

Encryption technology is used for communications to remote sites to prevent information from being stolen.

### Detailed User Management

**User identification :** Authorization using user IDs and passwords is employed to prevent unauthorized access.

**Access authority :** The functions that can be used are restricted for individual login users to prevent unauthorized use.

## Schedule control

- Annual schedules can be set for each remote controller group / user defined group.
- Start / stop, operating mode, remote controller prohibition, and temperature settings can be set up to 143 times per day at 10 minute intervals for up to 101 configurations for each remote controller group.
- Settings can be made for periods straddling midnight.
- Allows programming of special settings for holidays, including public holidays, for a complete year.
- Low noise operation of outdoor unit can be scheduled.

## Diverse control of indoor units

- Indoor unit operation state, operation mode, etc. are displayed
- Indoor unit start / stop and operation mode switching
- Temperature setting, Remote Controller prohibition.

## Operating Conditions

The following chart shows the detail requirement for an AT compatible personal computer to run System Controller. Applies for both VRF Controller and VRF Explorer PC.

Personal Computer	AT compatible machine that runs Microsoft® Windows®	
	Operating System	Microsoft® Windows® XP Professional (Service Pack 3 or later / English version) Microsoft® Windows Vista® Home Premium, Business (Service Pack 2 or later / Corresponds to 7 different languages.*) Microsoft® Windows® 7 Home Premium, Professional (Corresponds to 7 different languages.*) *English, Chinese, French, German, Spanish, Russian, Polish •64-bit version of Windows® are not supported.
	CPU	Intel® Pentium® / Celeron 2 GHz (VRF Controller), 1 GHz (VRF Explorer) or higher
	HDD	40 GB or more of free space (5 GB for VRF Explorer PC)
	Memory	2 GB or more (VRF Controller), 1 GB or more (VRF Explorer)
	Display	1024 x 768 dots or more. 15 inch or higher size is preferable.
	Interface	USB port is required for each of the followings for Server PC ; • Wibu Key (Software protection key) • Echelon® U10 USB Network Interface (Required for each VRF Network) Ethernet port is required for remote connection using internet.
	Accelerator	Requires the internal graphics accelerator be compatible with Microsoft® DirectX® 9.0
	Other Software Required	Adobe® Reader® 9.0 or later

### <OPTION AVAILABLE>

Energy Saving Software	UTY-PEGX(*1)	Additional support for energy saving function and Electricity Charge Apportionment using electricity meter.
------------------------	--------------	-------------------------------------------------------------------------------------------------------------

### <PACKING LIST>

Item	Q'ty	Application
CD-ROM	1	Includes the software for System Controller. Both VRF Controller and VRF Explorer software is included.
Wibu Key (Software protection key)	1	Software protection key to be inserted in a USB slot running System Controller. System Controller may only run on a PC with Wibu Key. Remote VRF Explorer software does not require Wibu Key.

Personal computer must be field supplied. U10 USB Network Interface must be field supplied. Contact Echelon® Corporation or its local sales representative for detail.  
Product Name : U10 USB Network Interface - TP/FT-10 Channel Model Number : 75010R  
\*1: Energy Saving Software (UTY-PEGX) is available for the indoor units and the outdoor units after revision code B

## Error display & E-mail notification

Error is notified with popup message, audible sound and E-mail real time when error occurs. Error for the past 1 year are logged and can be reviewed later.

## Operating & control record

Displays the history of operation status and control.

## Prohibition Setting

This prohibits changes to the operation mode, temperature, start / stop, etc.

## Multiple language display

Corresponds to 7 different languages (English, Chinese, French, German, Spanish, Russian, Polish)

# Network Converter

## UTY-VGGX

Max. connectable  
**16**  
single indoor units

Max. connectable  
**4**  
Group Remote  
Controllers

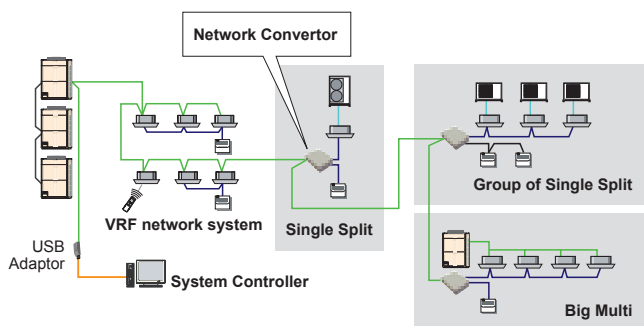

- This Network Converter is to be used for connecting single split system or Group Remote Controller (UTY-CGGY / UTY-CGGG) with the VRF network system.
- Please select the function by switching the dip switch during the installation.

## Functions

### Used for connecting single split system

- Split type systems can be centrally controlled from Touch Panel Controller or System Controller through connection to the VRF's network converter.
- On / Off Control, Master control, Room temperature and Fan speed setting via the Network Converter are available.
- One Network Converter can be used to connect and control up to 16 single units.

Please consult your distributor for connectable split type air conditioner.  
Up to 100 Network Converters may be connected in single VRF network system.  
One Network Converter is considered as a single refrigerant system, irrespective of the number of connected single models.

### Used for connecting Group Remote Controller

4 Group Remote Controllers can be connected to a single Network Converter (UTY-VGGX).

\* 2 refrigerant circuits can be covered by a single Network Converter (UTY-VGGX).  
Up to a total of 16 Network Converters (UTY-VGGX) and System Controller adaptors can be connected in a single VRF network system.

## Specifications

Model name	UTY-VGGX
Power Supply	220-240V 50/60Hz
Power Consumption (W)	8.5
Dimensions (H x W x D) (mm)	67 x 288 x 211
Weight (g)	1,500

## Dimensions (Unit : mm)

# Network Converter for LONWORKS®

## UTY-VLGX

- For connection between VRF network system and a LONWORKS® open network for management of small to medium-sized BMS and VRF network system.
- The UTY-VLGX permits central monitoring and control of a VRF network system from a BMS through a LONWORKS® interface.
- Up to 128 Indoor units can be connected to one Network Converter for LONWORKS®

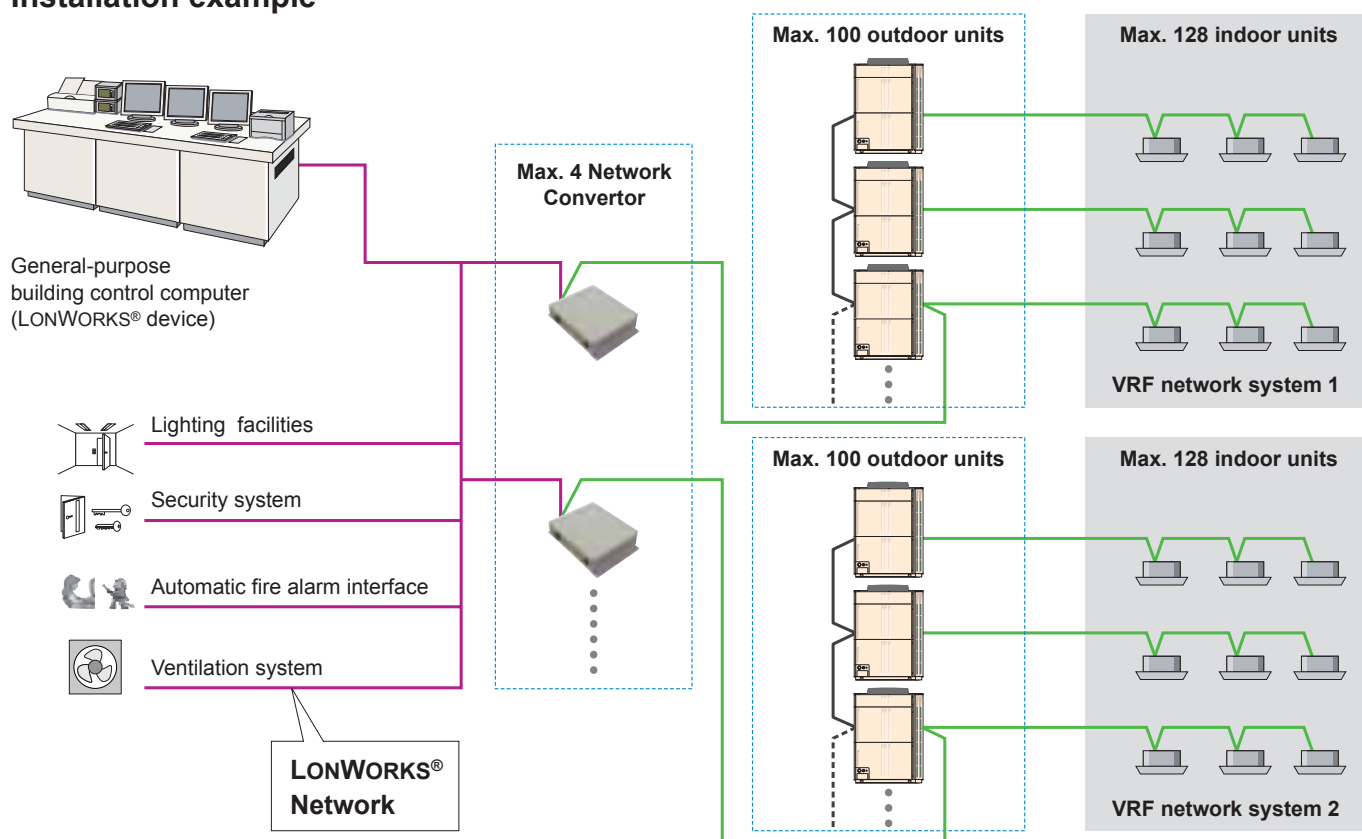

Max. controllable  
**4**  
Units to BMS

Max. controllable  
**100**  
Outdoor units

Max. controllable  
**128**  
Indoor units

### Installation example

### Specifications

Model name	UTY-VLGX
Power Supply	220-240V 50/60Hz
Power Consumption (W)	4.5
Dimensions (H x W x D) (mm)	67 x 288 x 211
Weight (g)	1,500

### Transmission specifications (BMS side)

Transmission speed	78 kbps
Transceiver	FT-X1 (Echelon® Corporation)
Transmission way form	Free topology
Terminal resistor	None (It attaches at the terminal of a network.)

### Dimensions (Unit : mm)

# BACnet® Gateway

Software

## UTY-ABGX

- It is possible to connect medium to large sized BMS to VRF network system via BACnet®, a global standard for open networks.
- A maximum of 1600 indoor units with 4 VRF network systems (a maximum of 400 indoor units & 100 outdoor units for one network system) can be connected to one BACnet® Gateway.
- It is possible to control or monitor VRF network system from BMS via BACnet® Gateway.
- Compatible with BACnet® (ANSI / ASHRAE-135-2004) application specific controller (B-ASC).
- Compatible with BACnet®/IP over Ethernet.
- Scheduling function, Alarm & Event functions as well as Electricity Change Apportionment function are provided in BACnet® Gateway.
- Connection between VRF network system to personal computer is possible via small U10 USB interface. However, both U10 USB interface & personal computer are field supplied items.
- Corresponds to 7 different languages, English, Chinese, French, German, Spanish, Russian, Polish.

## PERSONAL COMPUTER SPECIFICATIONS

	For BACnet® Gateway (UTY-ABGX)
CPU	At compatible machine that runs Microsoft® Windows® Intel® Pentium® / Celeron®, AMD Athlon / Duron processor 2 GHz or higher
Hard Drive	40 GB or more of free space
Memory	2 GB or more
Display	1024 x 768 dots or more, High color (16bit) or more
Interface	USB port (x 2-5) is required Ethernet port is required
Operating System	Microsoft® Windows® XP Professional (Service Pack 3 or later / English version) Microsoft® Windows Vista® Home Premium, Business (Service Pack 2 or later / Corresponds to 7 different languages.*) Microsoft® Windows® 7 Home Premium, Professional (Corresponds to 7 different languages.*) *English, Chinese, French, German, Spanish, Russian, Polish •64-bit version of Windows® are not supported.
Required Hardware	CD-ROM drive
Required Software	Adobe® Reader® 9.0 or later

### <PACKING LIST>

Packing List	CD-ROM / Wibu Key
--------------	-------------------

Personal computer must be field supplied. U10 USB Network Interface must be field supplied. Contact Echelon® Corporation or its local sales representative for detail.  
Product Name : U10 USB Network Interface - TP/FT-10 Channel Model Number : 75010R

# Signal Amplifier

## UTY-VSGX

- Transmission Line length can be extended up to 3,600m with multiple Signal Amplifiers.
- Up to 8 signal amplifiers can be installed in a VRF network system.
- A signal amplifier is required,
  - (1) When the total wiring length of the transmission line exceeds 500m.
  - (2) When the total number of units on the transmission line exceeds 64.

### Installation example

### Specifications

Model name	UTY-VSGX
Power Supply	220-240V 50/60Hz
Power Consumption (W)	4.5
Dimensions (H x W x D) (mm)	67 x 288 x 211
Weight (g)	1,500

### Dimensions (Unit : mm)

# External Switch Controller

## UTY-TEKX

Air conditioner switching can be controlled by connecting other sensor switches

- In combination with a field supply Card-Key Switch or other sensor, the External Switch Controller allows control of the ON / OFF, Room temperature, Fan speed and Master control functions. This makes this product suitable for installations such as hotel rooms.
- Card-key or other sensor switches are available as a field supplied parts.

### Installation example

Auto mode operation, which switches the cooling and the heating automatically, is enabled by using the sensor switch and External Switch Controller.

Note: All indoor units will operate in the same mode.

### Electrical wiring

### Specifications

Model name	UTY-TEKX
Power Supply	DC 12V
Dimensions (H x W x D) (mm)	120 x 75 x 30
Weight (g)	90

DC12V is supplied by the indoor unit.

# Service Tool

**Software**

## UTY-ASGX

Max. Monitor and control  
**100**  
Outdoor units

Max. Monitor and control  
**400**  
Indoor units

Extensive monitoring and analysis functions for installation and maintenance.

- Operation status can be checked and analyzed to detect even the small abnormalities.
- Data collected and stored on site can be checked later, off-line, off-site for more detail analysis.
- One VRF network system with maximum number of up to 400 units can be monitored and controlled.
- Operation status and various sensor information can be monitored and checked real time in the form of list, refrigerant circuit diagram, graphs as well.
- Simple operation control functions are useful during maintenance.
- The recent error history can be retrieved from units on demand to perform analysis on the cause of the error, after connecting Service Tool to the VRF network system.
- Commissioning tool supports test runs, data storage for each unit and saving of data as CSV files, which may be formatted to create commissioning report.
- Connectable to any point of transmission line with USB adaptor\*<sup>1</sup> (field supplied)
- Connection between VRF network system to personal computer is possible via small U10 USB interface. However, both U10 USB interface & personal computer are field supplied items.
- New 8 functions are added for V-II series and service performance is advanced furthermore. (supported by Ver. 1.1 or later)

\* 1: Service Tool (UTY-ASGX) will only support USB type network adaptor and will not support transmission adaptor of the traditional type(UTR-YTMA)

## Wiring connection

\*USB Adaptor is U10 USB Network interface of Echelon® Corporation.

## Functions

### 1) System List

Displays the overall operation status of all or specified units in the system in a list form.

### 2) Equipment Detail (Diagram)

Displays the detail information for sensor values, electrical components etc. for the specified units in schematic. The information here can be used along with the detail information in list form, to check the operation status of units and make detail analysis on the cause, in case an error occurs.

### 3) Equipment Detail (List)

Displays the detail information for sensor values, electrical components etc. of units in a specified refrigerant system in list form. The information here can be used along with the detail information in diagram form, to check the operation status of units and make detail analysis on the cause, in case an error occurs.

### 4) Operation History

The indoor units or outdoor unit operation history can be recorded. The displayed operation history can be printed out and saved to a CSV file.

### 5) Error History

Displays the error information for each unit. The error information can sequentially be displayed up to 50 items as they occur starting with the latest error.

### 6) Remote File Download

Operation and error history data can be downloaded. Only the required data may be downloaded specifying the refrigerant system, unit and time range.

### 7) Commissioning Tool

Test run commands can be executed with this tool. During test running, the outdoor unit / indoor unit sensor data can be saved (commissioning log data). After the end of test running, this data can be exported in CSV file format.

### 8) Network Topology Analyzer \*

A list of units connected to the VRF system network is displayed in network segments in tree form.

### 9) Remote Setting \*

Function (Field) Setting for indoor unit is realized remotely

### 10) System Time Setting \*

An arbitrary time is set for all the remote controllers within the system.

### 11) Software Version \*

The software version of units are acquired and displayed.

### 12) Central Release \*

The operation setting restriction function of the indoor units set from the controller can be forcibly released.(remote controller inhibit, temperature upper/lower limit setting)

### 13) Model Name Writer \*

An arbitrary model name can be written to the target unit.

### 14) Error Memory Reader \*

When an error occurs at an outdoor unit, the operation data records before the error are acquired over a network and saved to a CSV file.

Note: To perform "Error Memory Reading", Service Tool and the corresponding outdoor unit must be connected directly with each other. Refer to the Operation Manual of the Service Tool for detail.

### 15) Time Guard Information \*

Reference data for judging the maintenance period of indoor and outdoor units (compressor,FAN, etc. integrated time) is output to a CSV file.

\*: Supported by Ver. 1.1 or later

## PERSONAL COMPUTER SPECIFICATIONS

Operating System	AT compatible machine that runs Microsoft® Windows® Microsoft® Windows® XP Professional (English version / Service pack 3 or later) Microsoft® Windows® Vista® Home Premium, Business Edition (English version) Microsoft® Windows® 7 Professional (English version) *64-bit version of Windows® are not supported.
CPU	Intel® Pentium® / Celeron®, AMD Athlon™ / Duron™ 1 GHz or higher
HDD	10 GB or more of free space
Memory	1 GB (Vista, 7), 512 MB (XP) or more
Interface	USB port for U10 USB Network Interface and Software protection key.
Required Software	Internet Explorer 6.0 or 7.0 or 8.0 / Adobe® Reader® 9.0 or later
Required Hardware	CD-ROM drive

#### <PACKING LIST>

Packing List	CD-ROM / Wibu Key

# Web Monitoring Tool

**Software**

## UTY-AMGX

**4**  
VRF network  
systems  
can be supported

**1600**  
Indoor unit  
can be monitored

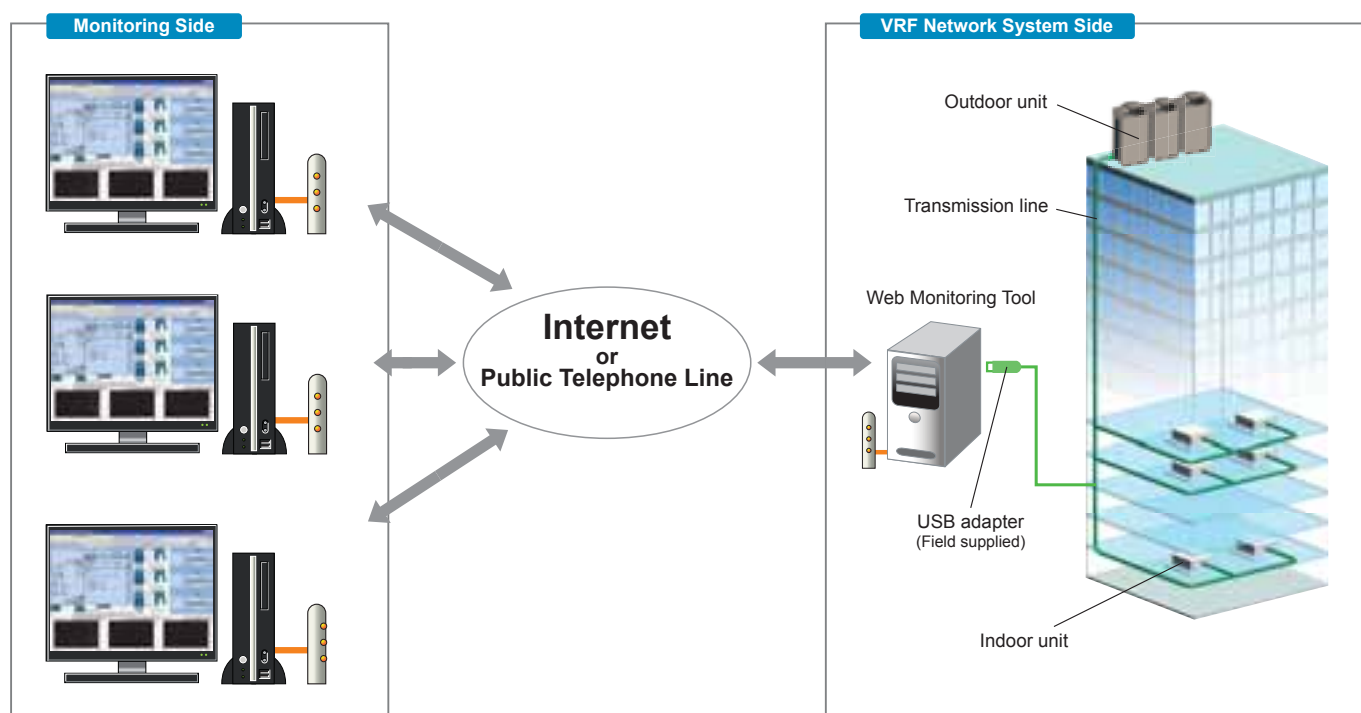

### Product features

- Troubleshooting is performed by monitoring each unit remotely during periodical system checks off-site.
- Operation status can be checked and analyzed to detect even the smallest abnormalities.
- Four VRF network systems each with 400 units, with maximum number of up to 1,600 units can be monitored and controlled.
- Operation status and various sensor information can be monitored and checked real time in the form of list, refrigerant circuit diagram, and graphs as well.
- The monitoring data in a remote side can be optionally downloaded. And, this data can be displayed in off-line mode of the Service Tool.
- Error notification can be automatically transmitted to several locations using the internet\*<sup>1</sup>.
- Monitoring side computer is not required to install special software, requires only general web browser.
- Connectable to any point of transmission line with U10 USB interface\*<sup>2</sup> (field supplied)
- Connection between VRF network system to personal computer is possible via small U10 USB interface. However, both U10 USB interface & personal computer are field supplied items.
- New 6 functions are added for V-II series and service performance is advanced furthermore. (supported by Ver. 1.1 or later)

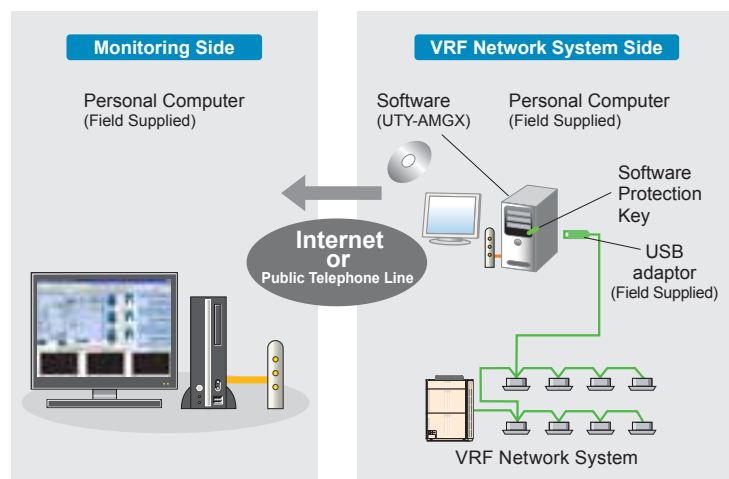

\* 1: USB of internet mail system required.

\* 2: Web Monitoring Tool (UTY-AMGX) will only support USB type network adaptor and will not support transmission adaptor of the traditional type (UTR-YTMA).

## Web Monitoring System

## System components

## Support 4 VRF network systems

USB adaptor (max. 4 adaptors per PC) permit, monitoring of up to 1,600 indoor units.

Suitable for large-scale buildings or hotels.

# Energy Recovery Ventilator

## Models

**UTZ-BX025A**  
**UTZ-BX035A**  
**UTZ-BX050A**  
**UTZ-BX080A**  
**UTZ-BD100A**

Energy recovery ventilator unit offers maximum comfort and greater energy savings.

## Heat exchange ventilation and normal ventilation

### Heat exchange ventilation

When a room is cooled or heated, the exhausted cooling / heating energy is recovered by heat-exchange ventilation.

### Normal ventilation

This is used in spring and autumn, when rooms are not cooled or heated, that is, when there is little difference between the indoor and outdoor air conditions. In addition, at night during the hot season, when the outside air temperature drops the outside air is drawn inside without heat exchange, alleviating the load on the air conditioning equipment.

### Adopts a highly efficient counter-flow heat exchange element

## Specifications

Rated flow rate				250 m³/h	350 m³/h	500 m³/h	800 m³/h	1000 m³/h

Operation range			°C	-10 to 40	-10 to 40	-10 to 40	-10 to 40	-10 to 40
Maximum humidity			%	85	85	85	85	85

\* The noise level must be measured 1.5 m below the centre of the unit.

## Energy efficiency and ecology

Energy consumption is dramatically reduced by using a counterflow heat-exchange element. Air conditioning load is reduced by approximately 20%, resulting in significant energy savings. Recovers up to 77% of the heat in the outgoing air.

**20%**  
Energy saving

### Features of heat exchange element

With the cross-flow element, air moves in a straight line across the element. With the counter-flow element, air flows through the element for a longer time (longer distance), so the heat-exchange effect remains unchanged.

Other element  
(Cross-flow element)

Fujitsu element  
(Counter-flow element)

## Features of heat exchange element

Significantly reducing low pressure loss and noise allows low-noise operation of 32 dB (High) or less for models with a capacity of 500 m³/h or less, and 37.5 dB (High) for models with a capacity of 1,000 m³/h.

## Long heat-exchanger service life

Cleaning reduced due to the special material heat exchanger. The nylon/polyester fibre filter offers high dust retention capacity.

## Slim shape and easier installation

Counter-flow heat exchange element used for reduced noise and slimmer, more compact body shape.

UTZ-BX025A/BX035A/BX050A

UTZ-BX080A/BD100A

## Reverse mountable direct air supply / exhaust system

**Adoption of straight air supply / exhaust system:** Duct design is simplified because the air supply / exhaust ducts are straight.

**Since each unit can be mounted in reverse position, only one inspection hole is needed for two units:** Two units can share one inspection hole so duct work is easier and more flexible.

Fujitsu General Supports Diverse

# VRF System Design

## 1. Quick model selection and design tool "Design Simulator" for VRF

Fujitsu General offers software which quickly performs model selection and creates material for model estimation in the VRF initial design stage. "Design Simulator" has functions which automatically select the proper model for the required capacity, automatically draft piping diagrams and wiring diagrams, and also automatically calculate the additional refrigerant charge amount, automatically generates the reports necessary for estimation. Operation is also easily performed by drag & drop and full-fledged model design estimates can be quickly made.

### Features

- Automatic model selection of indoor unit and outdoor unit
- Simple drag & drop operation
- Automatic generation of piping diagrams and wiring diagrams
- Automatic calculation of additional refrigerant charge amount
- Auto CAD Data (DXF), Revit Mep Data (RFA) export
- Automatic report generation (Word, Excel)
- Multi-language capability

Design Simulator  
for  
FUJITSU VRF

## 2. 2D (DXF), 3D (RFA) contents data

Two kinds of model data, DXF data and RFA data, necessary in detailed design are offered. These data can be procured from the Fujitsu General web site and Design Simulator

RFA data

FGL Web site
